

Active Single Christian Scientists Association

We are an events and activities group that strives to express joy through adventure and discovery. Are you ready to join our family of friends? We would love to welcome you!

ASCSA is a not-for-profit volunteer organization whose purpose is to provide opportunities for active, single Christian Scientists to meet each other and enjoy fun-filled weeks/weekends of camaraderie, sports, and entertainment. ASCSA events are open to all adult, unmarried students of Christian Science. (Please note: We are not a dating or matchmaking service.)

ASCSA was founded in 1996 by six, single Christian Scientists in Atlanta, Ga., who wanted to create events for busy, single professionals who practice Christian Science. Since then, more than 800 attendees from across North America and as far away as China and Italy have enjoyed our trips. We are democratically governed by a council of active members from across the country and maintain a set of bylaws to ensure we fulfill our mission in fun and creative ways.

We typically offer a winter trip that includes a range of snow-related activities such as skiing, skating, snowshoeing, and sledding. Our Labor Day event takes place at a Christian Science summer camp and includes all the outdoor activities those venues provide such as swimming, hiking, waterskiing, boating, challenge courses, and more. ASCSA members have hosted fall Caribbean cruises and New Year's events. We are always open to new ideas!

If you would like to be on the mailing list or host an activity in your area, send us an e-mail at mail@ascsa.us

Visit our website, www.ascsa.us to see a schedule of our trips, explore our photo galleries of past trips and make some new connections! You can also search for ASCSA on Facebook.

If you know a friend, family, or church member who would appreciate knowing about ASCSA please share this flyer with them and post a copy on your church bulletin board. Thank you and hope to see you soon!
